

Portable Ozone Generator TROG-605

www.safetyzon.com | info@safetyzon.com

Description

Portable Ozone Generator TROG-605 is a lightweight and portable device. It can use for a variety of sterilization and purification treatments. It applies to both air and water, and it operates on the tube type-high voltage discharged gap principle. Designed with stainless steel and therefore can start producing O₃ at a rate of 15 g/h. It performs and has a long service life.

Features:

- > It is having with good performance and long life
- > It is equipped with a stainless steel chamber
- > This applies to the use of air and water due to the operating principle of tube-type high voltage discharge paths
- > It has a lightweight and portable device
- > It can generate O₃ ranges
- > It is having with an ozone concentration
- > Intended with a high voltage ionization
- > It is both industry and household type
- > It is an automatic control time type device
- > It is having with a cool wind of Byo

Specifications :

Application	Both can use air and water
O3 range	15 g/h
Overall size	500 ×160× 220 mm
Packing Size	550×220×270 mm
Power	220V/ 50HZ

West 110th Street Overland Park KS 66210, USA
